

Weiskopf Consulting 2018 IT Assessment

Do you have professional IT Support for your company? Yes No

Is your IT Support someone in your Office, not a professional? Yes No

Do your eyes ever glaze over when your staff describes IT needs or challenges.

- Is your IT Plan...If it isn't broke, its fine?
- Does your IT Professional help you to understand your needs?

Do you sometimes feel like you don't know what types of IT questions to be asking to plan for your business's future.

- Do you feel you lack the necessary expertise to evaluate your IT needs, design solutions, deploy new processes and/or isolate and repair problems should they occur?
- Do you have a backup plan in place for critical documents, other than your hard drive?
- Have your computers been scanned recently for Malware, Viruses and Windows updates? Are they on a regular schedule?
- If you have multiple locations, is access to your shared documents and applications limited or slow for remote workers?

Has your company grown to the point that having existing staff handle IT duties is unreasonable.

- Do you sometimes wonder if your IT infrastructure should be assessed by an outside firm for potential vulnerabilities?
- When there's a problem, do you have trouble reaching or getting help from a real, live person?

How many questions could you answer?

We can help you answer every question. Call us at 630.474.3412 today.
